

## New for 2015

### The Piermont

A modern slatted teak PlanterSpeaker designed for the outdoors. The finely tuned enclosure and premium components give the Piermonts a rich sound usually reserved for boutique speakers.

### Flagstone subwoofer

A 400 watt subwoofer in the same enclosure as our Flagstone PlanterSpeaker. It features a 10" woofer with an aluminum cone and a four layer 2.5" aluminum voice coil.

### C-Flagstone

The worlds best outdoor residential speaker is now available in a high output version for commercial and outdoor home theater applications. Greater efficiency and higher power handling make the C-Flagstone the perfect choice for swimming pools, hotels, amusement parks, bars/clubs with live music or anywhere you need style, performance and reliability.

**Available 07-15-2015**

### The Charleston

Made from high quality cypress wood, the Charleston is perfect for decks, patios or anywhere space is limited. One stereo Charleston will fill an area up to 500 square feet . All models come with a removeable tray for live or artificial plants and flowers.

*\*The Charleston is in stock and, for the summer of 2015, available for the introductory retail price of \$999.00.*

### New Email Address

Orders can be placed by sending your purchase order to:  
orders@planterspeakers.com

### What does it mean?

Our Flagstone, Mini Flagstone, Mini Flagstone Jr., C-Flagstone, Westport and Southampton speakers are available in more than just the standard front firing configuration.

**Example 1:** *You have a large patio that leads to a pool. You could place a pair of Flagstone 180's between the pool and patio. With drivers on opposite sides of the cabinet (180°) you can cover both areas from a single pair of speakers.*

**Example 2:** *You are trying to cover a patio that wraps around the corner of a house. A Southampton stereo 90 can send sound in both directions. Matched up with a standard pair of Southamptons you can completely fill both sides from three speakers.*

We build models that will project sound from two or even three sides, covering large or complicated areas from a single enclosure. Both mono and stereo versions are available.

*\*NOTE - due to cabinet and speaker limitations, not all models are available in all configurations. See each product for available options.*

**The Piermont**

THE **PIERMONT** is a modern slatted teak PlanterSpeaker designed for the outdoors. The finely tuned enclosure and premium components give the Piermonts a rich sound usually reserved for boutique speakers. Live plants will thrive in its deep planter space. We included a drainage tube and Smart Pots soft bags for planting inside the speaker.

The Piermont is built to order. Please allow two weeks for construction.

**Specifications:**

Dimensions:

Piermont 17: 17" W x 17" D x 30" H

Piermont 21: 21" W x 21" D x 30" H
